# Tubular structure for fixing the floor guiding pads

• **Plank guidance**  
Perfect junction between the planks improving the sealing

• **Floor reinforcement**  
Structure + floor

• **Easy maintenance**  
Clipped Teflon skates

**Stainless steel sill plate**  
particularly resistant to the passage of the load and the friction of the planks

**Welded aluminium end-pieces**  
high strength for all applications

**Control box protected in a waterproof toolbox**  
Wired remote control or radio control (optional)

## Aluminium floor (15 planks)

**6 mm aluminium profiles**
